Velvet Drive 72 Series Marine Transmissions are available in a direct drive, in-line reduction and V-drive con guration. They include a wide selection of gear ratios, proven reliability and a heavy duty cast iron case. The 72 Series transmissions is rated for use with in pleasure craft, light duty commercial and heavy duty commercial applications. **Pleasure craft rating** is de ned as full throttle operation is used 5% or less and cruising speed at 80% or less. Total running time is 400 hours a year or less. **Light duty commercial** is de ned as full throttle operation is used 5% or less with 75% of full throttle operation being used for longer durations. Total running time is 1500 hours a year or less. **Heavy duty commercial** is much the same as light duty but extends running time to 2500 hours or less.

Velvet Drive 72 Series Direct Drive marine transmission. The 72 Series Direct Drives can be used with either standard or reverse rotation engines by simply rotating the hydraulic pump mounted on the front of the transmission.

Transmission	Gas engine	Diesel engine
Model	torque	torque
72C Pleasure	595 lb. ft.	450 lb. ft.
72C Commercial	425 lb. ft.	350 lb. ft.

Velvet Drive 72 Series In-Line reduction gear marine transmission. The 72 Series reduction gears can be used with either standard or reverse rotation engines by simply rotating the hydraulic pump mounted on the front of the transmission. Reduction ratios include 1.52, 1.88, 2.10, 2.57 & 2.91:1

Velvet Drive 72 Series V-Drives. The 72 Series V-Drives can be used with either standard or reverse rotation engines by simply rotating the hydraulic pump mounted on the front of the transmission. Opposite rotating propellers can be provided using twin, like rotation engines. Reduction ratios include 1.20, 1.51, 1.99 & 2.49:1

Liberty Series

The Libert Series Down Angle transmission is speci □cally designed for twin engine applications that require nearly horizontal engine installation. Its full reversing feature eliminates the need for opposite rotating engines, while the 8° "down angle" eliminates the problems that result from extremely steep engine installation angle. An improved hydraulic system provides more engine torque to the propeller. New design features such as an hydraulic pump and control valve make service easier. The control lever and dipstick are centrally located. Like all Velvet Drive® marine transmission, the Libert Series accepts □ywheel housing adapters and propeller shaft couplings from the complete line of Velvet Drive® accessories.

Model 5000V

The Series 5000V is designed speci □cally for V-drive applications. Its fully reversing feature allows for a twinengine layout using "automotive" rotating engines, while the 12 degree down angle between the input and output shafts allows the desired system installation. The coupling □ange, located on the opposite side to the

engine and hollow output shaft, provides position and **ease** of propeller shaft alignment. The compact design and aluminum case provide a lighter and considerably shorter package than the 72 Series V-drive. The improved hydraulic system, with reduced parasitic losses, offers more power to the propeller. The Series 5000V has the same engine adaptation features **as** the 72 Series and Libert Series down angle.
